

Multiple gas analyzer OC-2000

OC-2000 multiple gas analyzer adopts the most advanced large scale integrated circuit technology, the international standard of intelligent technology level design technology and proprietary digital simulation mixed communication design completely intelligent gas detector. It has advanced technology, excellent performance, high stability, which can detect the gas variety, with recovery factory default settings and since diagnosis function, use and maintenance convenience, greatly satisfy the industrial site safety monitoring of equipment with high reliability requirements, widely used in petroleum, chemical, environmental protection, metallurgy, refining, gas transmission and distribution, biological medicine, agriculture, etc

Features

- 1) It used ultra-low-power 32-bit MCU semiconductor nanometer process 24-bit ADC data chip, measuring accuracy is the highest level;
- 2) A 3.5-inch industrial-grade color at a resolution of 320x480, automatically self-checking for sensors, main chips and components after power on;
- 3) Display the concentration in ppm, %vol, mg/m3;
- 4) Can inspect 1~12 different kinds of gases;
- 5) Data storage for 0.1 million groups of data, optional printer to print the data.
- 6) Built-in powerful vacuum pump, pumping distance up to 5 meters, which can work under micro negative pressure environment. Reasonable design of the gas room can ensure that the sensor is not affected by pressure;
- 7) Optional temperature-humidity sensor;
- 8) Overcharge protection, over-voltage protection, short-circuit protection, anti static, anti-magnetic function;
- 9) Real-time checking, timed test 2 test mode can be selected to meet different occasions and different needs of different users;
- **10)** Automatic calibration for the sensors which up to level 6-point calibration to ensure measurement accuracy and linearity, also have data recovery function;
- **11)** Temperature compensation in full span, indicators for power, pump, alarm and failure.
- 12) Optional high temperature sampler.

Specifications

Luxeido, S.A. de C.V. http://www.luxeido.com

Luxe	Gas & Particles alalyzer		
Gas Type	CO2, CH4 , SO2, CO, O2, NOx, SOx		
Measureme nt Range	CO2:0~10000ppm CH4:0~50000ppm SO2: 0~100ppm CO: 0~1000ppm NOx: 0~100ppm SOx: 0~100ppm O2: 0~30%vol Particles: 2.5-10 PM mg/m3		
Sensor Type	Infrared sensor for CO2 and CH4; Electrochemical sensor for CO, NOx, SOx, O2, H2S.		
Accuracy	≤±2%	Response Time	≤20s (T90)
Linearity	≤±1%	Resume Time	≤20s
Repeatabilit y	≤±1%	Zero Drift	≤±1% (F.S/year)
Sampling	Pump-suction Speed of 2L/min	Alarm Mode	Audible-visual alarm
Working Mode	Real-time measurement and timing measurement (For timing measurement mode, the displayed data is average concentration in the timed period.)		
Storage Mode	Real-time storage and timed storage; Can keep record of 0.1 million groups of data		
Print Mode	Optional mini printer. User can set the print interval, auto-printing mode or manual printing mode.		
Pump Mode	Standard mode or vacuum mode. It can work in micro negative pressure environment.		
Data Resume	Factory default setting with one-key operating		
Self- checking	System checking for battery energy, display status, sensor and hardware		
Protection Grade	IP65	Working Temp.	-30°C~+60°C
Ex Grade	Exia II CT6	Working Humidity	≤95%RH (non condensing)
Dimension	230×120×220mm (L×W×H)	Working Pressure	-30Кра~100Кра
Weight	2.5Kg	Power Supply	6000mA rechargeable lithium battery
Optional	Wireless transmitters, transmission distance is 1000- 3000 meters, more optional GPRS transmission over a long distance		

Gas & Particles alalyzer

Remark: For different gas types, it used different gas sensor. If you have any requirement for other gas type or measurement range, please contact the manufacturer freely.
